

Product Update

JUL 13, 2004

#P152F

Revision 00

Applies to Flush doors

DOOR WEIGHTS

The following chart shows the weight in pounds per square foot for doors with a finished thickness of 1-3/4". The weights are approximates and apply to both high pressure decorative laminate and wood veneer doors. Cutouts, hardware, reinforcement blocking and wide stiles & rails will cause weights to vary.

Door	Pounds per Square Foot
Particleboard Core	5.5
Structural Composite Lumber Core	6
Stave Lumber Core	4.5
Mineral Core	5.5
STC 39	6
STC 45	6
Lead Lined with 1/16" lead	9
