VT Countertops available from:

BEAUTY & BALANCE

At VT Industries, our goal is to make selecting your countertop easy. Wherever you choose to install our countertops, we can help you beautify your home and balance your budget.

WHY CHOOSE VT FINE LAMINATE COUNTERTOPS?

Because what's underneath the laminate is just as important as the laminate design itself. Our countertops are built using only the finest materials available. It's what's made us the number one postformed laminate countertop manufacturer in North America.

WHAT IS A POSTFORMED COUNTERTOP?

Postforming simply means that the laminate is heated and wrapped around curved particleboard to produce a seamless front edge, countertop and backsplash. You get all the benefits of solid surface—handsome looks and no seams to collect dirt and grime—but for much less.

VT Countertops are also available without a backsplash, allowing you to further customize your look with tile, wood, laminate or paint. In addition, our one-piece countertops are easy to install. For new construction or major remodeling projects, you can work with the builder or fabricator to create custom pieces to complete your personalized design.

WHICH WILL YOU CHOOSE?

VT Countertops come in ten different profiles, including our latest premium contoured countertop edge styles, Valencia, Barcelona and Geneva. Plus we work with major laminate manufacturers, so there are thousands of design possibilities from classic styles to premium laminates that resemble the look and feel of granite, stone or solid surface. With the many options available from VT, you can get the style you want at an affordable price.

WHERE WILL YOU PUT YOUR FINE LAMINATE COUNTERTOP?

The kitchen, right? Actually, our countertops are perfect for use throughout the home:

- Stylish bathrooms
- Handy laundry rooms
- Sturdy surfaces for kids' rooms
- Useful desks in home offices
- Durable work surfaces for workshops and garages

When you're thinking VT countertops, think beyond the kitchen. You'll be surprised how versatile they truly are.

Painted Woodlands PDG002, Nevamar
